

# Hornbeam whips planted 05/03/22

- Five hornbeams were planted.
- Two are in the flower bed.
- The single hornbeams need to have a flower bed surround dug.
- To protect these from casual damage and dog interest until flower bed is established suggest they be enclosed by 4 short posts in a 300mm square (tree area).
- This tree area will be kept topped up with woodchip.
- Cornfield annuals to be sowed asap.
